Technical Lead with 12+ years of experience designing and delivering enterprise-grade web applications using React.js, Next.js, TypeScript, and Tailwind CSS. Proven expertise in front-end architecture, component-driven design, performance optimization, and mentoring teams. Skilled in delivering scalable, high-performance, and responsive applications for global clients like Caterpillar and Cargill.

EXPERIENCE

Technical Lead @ Onward Technologies Pvt Ltd

Jan 2023 – Present

- Frontend Technical Lead for Caterpillar's enterprise CSR eCommerce platform, responsible for leading frontend development, defining architecture, mentoring engineers, and delivering scalable, high-performance web applications using modern React technologies.
- Led a frontend engineering team, providing technical leadership, code reviews, mentoring, and enforcing coding standards across enterprise projects.
- Architected scalable and reusable frontend solutions using React.js, Next.js, TypeScript, Redux Toolkit, Tailwind CSS, HTML5, CSS3, and JavaScript.
- Collaborated closely with Product Managers, UX Designers, QA engineers, and Backend teams to deliver business-critical enterprise applications.
- Built reusable UI components and shared libraries aligned with the enterprise design system, improving consistency and reducing development effort.
- Optimized application performance through component optimization, efficient API integration, lazy loading, and rendering improvements, resulting in significantly faster page load times.
- Improved maintainability by introducing reusable architecture, modular components, and frontend best practices.
- Participated in sprint planning, technical estimation, solution design, and architecture discussions within Agile teams.
- Worked with REST APIs, GraphQL, authentication workflows, and enterprise integrations.
- Ensured responsive, accessible, and cross-browser compatible user interfaces following modern frontend development standards.
- Supported production releases, defect resolution, performance monitoring, and continuous application improvements.

Senior Software Engineer @ Cams Data

Sep 2021 – Jan 2023

- Engineered E-idx, an enterprise multi-location operator dashboard for monitoring productivity, quality, and sustainability KPIs using React.js, Redux, Material UI, Python APIs, and REST APIs.
- Designed and developed reusable, scalable UI components that improved application consistency, maintainability, and development efficiency across multiple modules.
- Integrated enterprise applications with Azure and AWS cloud services through automated CI/CD pipelines, enabling faster and more reliable software deployments.
- Enhanced application performance, responsive design, accessibility (WCAG), and overall user experience, contributing to improved user engagement.
- Collaborated with Product Owners, UX Designers, QA Engineers, and Backend Developers in Agile/Scrum teams to deliver high-quality enterprise solutions.
- Participated in technical design discussions, code reviews, debugging, and production support while maintaining high coding standards and best practices.
- Contributed to sprint planning, effort estimation, release management, and continuous improvement initiatives to ensure on-time project delivery.

Front-End Developer (Consultant) @ Data Analytics Services

Nov 2017 – Sep 2021

- Developed Sciqiq, a self-service data visualization platform with drag-and-drop database connectivity using React.js, Redux, Bootstrap, JavaScript, and Python APIs.
- Designed and developed analytics dashboards and client-facing web applications with a strong focus on responsive design, usability, and user experience.
- Delivered Robotic Process Automation (RPA) dashboards for finance and retail clients using R Shiny, Bootstrap, JavaScript, and Figma-based UI prototypes.
- Built reusable UI components and scalable frontend modules, improving application consistency, maintainability, and development efficiency.
- Integrated REST APIs and backend services to deliver secure, high-performance, and responsive enterprise applications.
- Collaborated with UX Designers, Business Analysts, and Backend Developers to translate business requirements into intuitive and user-friendly web applications.
- Ensured cross-browser compatibility, accessibility, and responsive design while following frontend development best practices.
- Participated in Agile/Scrum ceremonies, feature development, bug fixing, code reviews, and production support to deliver projects on schedule.

- Ensured cross-browser compatibility, accessibility, and responsive design while following frontend development best practices.
- Participated in Agile/Scrum ceremonies, feature development, bug fixing, code reviews, and production support to deliver projects on schedule.

UI Designer/Developer @ CE Infosystem Pvt Ltd

Jan 2016 – Nov 2017

- Designed and developed interactive web dashboards, UI widgets, and responsive user interfaces with a strong focus on usability, consistency, and user experience.
- Converted Photoshop and Adobe Illustrator designs into pixel-perfect, cross-browser compatible HTML, CSS, and JavaScript interfaces.
- Collaborated with UI/UX Designers and Development teams to implement responsive layouts and improve overall application usability.
- Developed reusable frontend components while ensuring design consistency across multiple web applications.
- Optimized web interfaces for responsiveness, accessibility, and cross-browser compatibility.

Web Designer @ Sahibji Travels & Tours

Nov 2013 – Jan 2016

- Designed, developed, and maintained the company's global website and multiple localized websites, ensuring a consistent user experience across regions.
- Managed website information architecture, navigation, content updates, and day-to-day website maintenance.
- Developed responsive web pages using HTML5, CSS3, JavaScript, jQuery, and Bootstrap while ensuring cross-browser compatibility.
- Optimized website performance through image optimization, basic SEO, and web analytics reporting.
- Created and edited graphics, banners, and multimedia content, including preparing videos for web publishing.
- Collaborated with business stakeholders to implement new website features and improve the overall digital experience.

Graphics / Web Designer @ Cerebral Business Research Pvt. Ltd.

Nov 2011 – Oct 2013

- Designed and maintained corporate websites with a focus on usability, visual consistency, and responsive layouts.
- Created website wireframes, graphics, banners, icons, and marketing materials using Adobe Photoshop and Adobe Illustrator.
- Converted visual designs into pixel-perfect web pages using HTML, CSS, and JavaScript.
- Managed website structure, content publishing, and ongoing maintenance for multiple business websites.
- Worked closely with clients and internal teams to deliver high-quality web and branding solutions.

PROJECTS

CAT eCommerce Portal → React.js

Developed a dealer-exclusive CSR eCommerce platform for Caterpillar's global parts distribution business. Led frontend development using React.js, Next.js, TypeScript, Tailwind CSS, and Material UI. Designed and developed responsive product listing and product detail pages optimized for desktop and mobile devices. Built reusable UI components aligned with the Caterpillar Design System, improving consistency and development efficiency. Optimized API integration, rendering, and frontend performance, reducing page load time by approximately 35%. Enhanced product search, filtering, and overall user experience through modern frontend architecture.

TechHealth → React.js

Enterprise healthcare platform for monitoring employee health and wellness across business operations. Developed responsive frontend modules using React.js, Redux, Material UI, and TypeScript. Integrated secure backend APIs developed in Python. Implemented Microsoft Authentication Library (MSAL) for enterprise authentication and authorization. Collaborated with backend and QA teams to deliver secure, scalable enterprise applications.

E-idex → React.js

Enterprise dashboard application used across multiple manufacturing locations to monitor operational KPIs. Developed interactive dashboards using React.js, Redux, Material UI, and TypeScript. Built visualizations for Productivity, Quality, Yield, Safety, Sustainability, and NIR metrics. Integrated Python-based backend APIs for real-time operational data. Developed reusable UI components to improve maintainability and user experience.

based backend APIs for real-time operational data. Developed reusable UI components to improve maintainability and user experience.

Sciq → [React.js](#)

Self-service data visualization platform enabling users to connect databases and build interactive dashboards without coding. Developed responsive user interfaces using React.js, Redux, Bootstrap, and JavaScript. Implemented drag-and-drop visualization features and interactive dashboard components. Built reusable frontend modules for charts, reporting, and data visualization. Collaborated with designers to deliver intuitive and user-friendly analytics experiences.

RPA Dashboard

Automation dashboard platform built for finance and retail clients to monitor robotic process automation workflows. Developed responsive dashboards using R Shiny, JavaScript, Bootstrap, and CSS3. Converted Figma designs into production-ready user interfaces. Built interactive reporting modules and data visualization dashboards. Worked closely with stakeholders to deliver customized enterprise solutions.

Connect

Mobile application designed for Panasonic dealers and distributors to manage products, training, events, and retailer engagement. Developed mobile application features using React Native. Implemented user authentication, registration, and role-based access control. Built modules for Products, Quizzes, Events, Gallery, Tasks, and Knowledge Base. Integrated backend APIs developed using Laravel.

EDUCATION

Bachelor in Computer Applications

2008 – 2011

[AN College](#)

Diploma in Graphic Designing

2006 – 2011
